

*Intelligent Waste Solutions.*

*WESKEM manages virtually all types of radioactive, hazardous and mixed waste generated by government and commercial entities. Our experience reflects broad expertise in all aspects of radioactive waste management.*

WESKEM, LLC is a member's managed, limited liability company in which Weston Solutions, Inc. (WESTON) is the principle member. The other member companies include NUKEM Corporation, Nuclear Filter Technology (NFT) Inc., and Horne Engineering Services, LLC. WESKEM was formed in 1999 by combining resources from WESTON and the other environmental companies specifically to focus on managing regulated waste and other hazardous materials at Department of Energy (DOE) facilities in Oak Ridge, TN on the Oak Ridge Reservation and the Paducah Gaseous Diffusion Plant site in Paducah, KY.

WESKEM provides safe, compliant, and cost-effective waste acceptance, characterization, disposition, storage, and on/off-site transportation of waste derived from decontamination and decommissioning, environmental restoration, and on-going operations under contract to Bechtel Jacobs Company LLC (BJC) on the Oak Ridge Reservation. WESKEM has managed over 62,000 containers of hazardous and nuclear waste, and has transported over 100 million kilograms of waste for off-site treatment and/or disposal. Wastes managed by WESKEM include industrial chemical waste, hazardous waste [which consists of Resource Conservation and Recovery Act (RCRA) waste and/or Toxic Substances Control Act waste], low-level radioactive waste, transuranic waste (both CH and RH), and mixed waste (both hazardous and radioactive). In addition to waste, other materials stored and transported on-site by WESKEM include, but are not limited to, surplus chemicals, non-waste nuclear packages, classified materials, resource lead, and spent nuclear fuel.

WESKEM also developed and implemented a program to disposition over 700 packages of highly hazardous and shock-sensitive materials generated over many years at various Oak Ridge sites without a single incident. WESKEM demonstrated that highly hazardous and shock-sensitive wastes can be managed safely, on schedule, and within budget.

WESKEM is responsible for management of nuclear and hazardous waste facilities under contract to BJC, including maintaining all safety authorization basis documentation. WESKEM is also cosignatory on all treatment, storage, and disposal facilities RCRA permits in Oak Ridge.

WESKEM has a proven track record of helping BJC achieve fee milestones while maintaining one of the most outstanding safety records in the DOE complex. WESKEM's Integrated Safety Management System (ISMS) program is fully proven and recently re-validated. WESKEM developed and applied a unique computer-based hazard assessment and reporting system in support of the ISMS program in Oak Ridge that has been recognized as an innovative tool to assure safety compliance for all waste management operations. WESKEM also developed a pocket-sized safety handbook for all their field employees. This handbook has fostered improved safety awareness and procedural compliance among field operations groups including client and other contractor staff.

WESKEM can help you achieve your waste management goals in a safe, compliant and cost effective manner. For more information, contact Andrew Smith, President at (865) 576-0079 or email: [asmith@weskem.com](mailto:asmith@weskem.com). Please visit us at: [www.weskem.com](http://www.weskem.com).
